

ACE duct

Protective cap

Article number: 600757

Date: 28-03-2024

ACE ducts is a flexible system in which fibre optic cables and fibre units can be installed. The system is fully enclosed protecting the fibre cables and units from dirt, dust and moisture. The ducts protect cables and fibre units against the most extreme conditions. They are manufactured from a halogen free, flame-retardant UL94/V0 polyethylene, and designed to meet material specifications required throughout Europe.
