

Fibre Optic Closure Tubes

ACE-DS-FOCT-v01-e

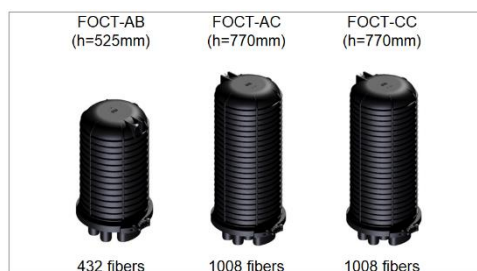

date : 14-04-2021

Flexible, time-saving and ease of installation

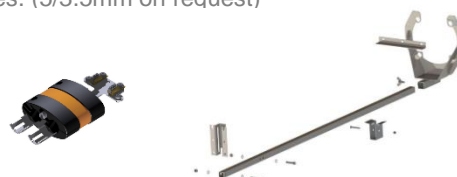

The ACE Fibre Optic Closure for Tubes are pre-assembled closure kits for multi tube cable networks. Four meter lengths of mini tubes are introduced in the closure and sealed. The tubes on the outside of the closure are protected with a 3.5 meter length of flexible tube for easy installation in an access chamber. On the inside the tubes are protected for water intrusion with tube end connectors. The tubes on the outside are equipped with heatshrink seals.

The water- and gastight pre-assembled closures are tested and delivered with a testing and quality report. This pre-assembled closure design is developed by TKF in close cooperation and interaction with our customers, which resulted in an easy and cost effective solution. No more sealing in all kind of weather conditions, straight away connect your customer tubes and introduce the feeder cable. Connect your customers at the first deployment or in a later stage, success based.

7/4mm	24 tubes	48 tubes	72 tubes	96 tubes
	FOCT-AB	FOCT-AB	FOCT-AC	FOCT-CC
10/8mm	12 tubes	24 tubes	36 tubes	48 tubes
	FOCT-AB	FOCT-AB	FOCT-AC	FOCT-CC
12/10mm	16 tubes	24 tubes	32 tubes	
	FOCT-AB	FOCT-AB	FOCT-CC	

The standard kits above are available with 7/4mm, 10/8mm or 12/10mm tubes. (5/3.5mm on request)

Closure frames for handhole mounting and oval seals for introducing the feeder cable can be ordered separately according the handholes and cables used.
